

5 Ways To Save Space in Your Hotel

Hotel space is often at a premium, and finding ways to increase your revenue per available room (RevPAR) can be a challenge. Smart hotel design includes multi-function space that can be utilized to meet guest needs in a variety of ways without compromising on design.

Learn how you can increase your RevPAR easily and conveniently with Wall Beds.

WALL BEDS MANUFACTURING

1

Turn meeting rooms into sleeping rooms

Meeting space at hotels is necessary, but can often go unused. Unbooked meeting rooms leave important revenue streams on the table. What if you could easily turn those unused meeting rooms into guest rooms? With Wall Beds easy to use murphy style beds, you can! Wall Beds are the hospitality industry's best kept secret. But, we have grown to be one of the largest suppliers of murphy-style beds in the country. We are proud of the fact that our beds are used by several of the finest hotels and vacation resorts throughout the world.

2

Add more guests per room

With Wall Beds, hotels can easily accommodate additional guests per room. Suites can handle larger groups and families, increasing your RevPAR conveniently. Guests can easily close the bed during the day to make full use of their common area. At night, they simply pull down the bed to allow for additional sleeping space. Bedding and pillows can be left on the bed while it's closed, so guests do not have to make and unmake the bed every time. They and housekeepers are sure to appreciate having less work!

3

Create multifunctional hospitality suites

Hospitality suites are a nice offering, unless they sit unused and empty. Imagine being able to quickly turn a hospitality suite into a guest room with little work. With one handed operation, it's easy to pull a Wall Bed down or push it back up. When closed, they look like extra storage space and can beautifully accent rooms in a range of colors and finishes.

4

Increase storage without decreasing capacity

With the addition of side cabinetry, a Wall Bed can add additional storage to a guest room without compromising space. Options for additional storage can be designed with shelving, closets and drawers. Cabinetry can include doors for storage of extra pillows, linens and more or left open for side lamps and decor items. Our stylish, handcrafted beds come in many different options and can easily be designed to fit within your existing decor.

5

Maximize room space

Your guests will enjoy the additional space that a Wall Bed option provides in their room. A sofa/wall bed unit provides for a large home-like family room by day, with plenty of space for guests to move around. At night, the bed easily pulls down over the sofa. Rooms could also be designed to accommodate working travelers, allowing for an office-like workspace by day and a sleeping room at night.

Your options are limitless

Wall Beds are available in a variety of designs or can be custom built to suit your specific needs. With any style or finish you choose, you will quickly see how Wall Beds help you optimize room capacity, enhance room functionality and generate more income!
